Empfohlenes Vorwissen

Basic knowledge in the subject area Future of Work, Human Resource Management, & Organization.

Abstract

Specialist seminar, offered with a semester-dependent focus. The purpose of the seminars is to deal intensively with specific topics in a small group and to work on them in a theory-guided manner.

To participate in the seminar an application is necessary. More information is available on the Chair's homepage.

Qualifikationsziele

Students who have successfully completed the masterseminar "Future of Work, Human Resource Management, & Organization",

- become familiar with the research process,
- are able to identify and explain the state of the literature on the seminar topic,
- learn how to craft an academic paper,
- learn how to structure and evaluate literature and embed it in their own argumentation,
- become familiar with the common empirical methods applied in management research,
- are able to present results in an oral presentation,
- learn how to reflect on critical comments in the process of writing a paper.

Lehrinhalte

- This seminar provides students with skills for academic writing, critical discussion and interpretation of results based on current topics in the field of Future of Work, Human Resource Management, & Organization.
- Specific research topics are addressed, systematized and reflected upon.
- Empirical methods of management research are introduced, applied in practice and critically evaluated.

Literaturangaben

Varies according to topics covered.

Didaktisches Konzept

Interactive teaching sessions with presentations, discussions and lectures. The course is partly lecture-style (introduction to topic, theory, and methods) and partly requires the active participation of the students (presentation and discussion of a scientific paper in a conference style) and active research by students for crafting the seminar paper.

Kolloquium: Colloquium Future of Work, Human Resource Management, & Organization (3 Credits) [3 Credits]

Name im Diploma-Supplement	Colloquium Future of Work, Human Resource Management, & Organization		
Lehrstuhl	Lehrstuhlbezeichnung und URL werden automatisch eingesetzt		
Lehrende	Prof. Dr. Ahrens		
SWS	2	Turnus	Each semester
Sprache	Englisch	maximale Hörschaft	10

Empfohlenes Vorwissen

Basic knowledge in the subject area Future of Work, Human Resource Management, & Organization.

Abstract

Colloquium for students who are in the process of writing their final thesis.

Please have a look at the application regulations for a final thesis at the Chair's homepage. Prerequisite for the participation in the colloquium is the admission to the final thesis. This course is mandatory for all students that want to write their final thesis at the Chair

Qualifikationsziele

Students who have successfully participated in the "Colloquium Future of Work, Human Resource Management, & Organization":

- outline the fundamental ideas of their final thesis and describe the motivation assumptions and mechanics of their scientific work.
- present their scientific approach in their final thesis to other students and structure the key points in an individual exposé.
- design a specific, empirical research method and implement these research methods in a scientific way.
- justify the own work progress and reflect on their own scientific work and the work of other students and reflect on central organization theories used in the field of Future of Work, Human Resource Management, & Organization.
- evaluate their own scientific work and progress and combine related scientific methods with specific research questions.
- develop suggestions on possible ways forward regarding the theoretical and practical implications of their scientific work.

Lehrinhalte

The colloquium further enables students to prepare, present and discuss an independent scientific paper.
